market review

Mercer Island's Median Sale Price rallied back up in Q2 to \$1.8 million after lower than typical sales drove it down to \$1.53 million in Q1. Eight waterfront sales contributed to the overall increase, as did the total sales velocity of 101 homes sold in Q2—the highest number of sales than in any of the preceding eight quarters.

Changes in the home lending environment drove down mortgage interest rates in Q2 to their lowest levels in years, giving buyers more buying power for their money and stimulating demand for available homes on the market.

As stated in earlier reports, the market has much to offer buyers and sellers this year. We believe those looking to make a move in the next few years should do so this year when they can still secure incredibly affordable mortgage financing. Today's buyers should be prepared to stay in their home at least five years. Home sellers moving to lower cost regions may also benefit from selling now. We know that every situation is unique, and we are here to help you evaluate your personal real estate holdings and purchase strategy.
